

Real Scrum training created by seasoned practitioners, now available on demand, at your pace, for a fair price.

Truth-Telling and Path-Finding  
Guides of Agile Teams, Leaders  
and Organizations

## The Theory and the Reality

Fake Agile and Scrum charlatans run amok. In this course you will learn how proper Scrum works, because this course was created by Agile pioneers who've been on the hook for making it work.

You will learn lessons gained from the trenches. There is a continual focus on what works well, where teams fall short and common dysfunctions to avoid. This course embodies agility In Real Life.

## Created for Humans

The course is way more than a collection of online videos. or a PowerPoint endurance contest. It's real online training. You will learn the material covered in two-day, in-person courses, but at a level of depth appropriate for remote learning. At \$189, it's excellent training value.

- 12 modules average 25 minutes in length
- Meaningful progress in small increments
- Videos are under 10 minutes
- Stay focused and retain information.

Designed for adult learners, each crisp and clean module includes a brief introductory exercise to engage learners, a video explaining the topic, exercises to reinforce the concepts from the video and a learning log to reflect on what they learned

## Don't Be a Poser

Don't fake it - own it! The human capacity to detect a poser is immediate. With this course, feigning a working proficiency with Scrum is unnecessary.

Scrum Fundamentals is designed for:

- People new to Scrum, to gain a solid foundation of the theory AND the practice.
- People working in Scrum who seek a quick, easy, and reliable recalibration.
- Companies who want a common foundation of knowledge and language.
- People who have a stake in the success of a product or service being developed using the Scrum framework
